

Prepare for your practical driving test – view all assignment cards here

Your practical driving test begins with three tasks

At the beginning of your driving test, you will be given three tasks from an assignment card. These tasks require you to check various parts of the vehicle you are taking the test in – for example the brakes, lights, tyres, or other components for which you are responsible as the driver.

Remember the mirrors – you will always be asked about them

Regardless of which licence category you are taking the test for, in addition to the three tasks you must always remember to check the mirrors before you and the driving examiner set off.

The mirrors must be:

- Correctly adjusted
- Clean and free from damage

Assignment Card No. 1 – Category B

Please check / How would you check the:

Brakes:

- **Brake fluid:** Between min. and max. or warning light not activated.
